

# 2014 Nebraska Manure Demonstration Day Demonstration Program

## Liquid Manure Demonstration ..... 11:00 AM

### Continuous Flow Drag Line Demonstration

Loeske Drag Line

Liquid manure holds the highest Ammonium Nitrogen Content of any manure . Delivering the effluent through a hose is the most cost effective way to move the product to the field.

## Dry Manure Demonstrations ..... 2:30 PM

### 1 - Krause - Model: 1200 Gladiator

Harchelroad Motors

Using current farm tillage practice, strip till equipment, to apply variable rate dry pelleted manure in the direct root zone of your crops. - 30 foot swath width

### 2 - SPREAD-ALL - Model: TK22T - Vertical

West Point Design

SPREAD-ALL TK22T - Vertical is a commercial grade box spreader dedicated to the changing environment of the cattle producer. Simple in design, yet rugged for years of service. - 40 foot swath width.

### 3 - Bunning - Model: 380HD with Spinnerdeck

Onken Feedlot

380 HD heaviest built machine with capability to handle a wide variety of products. Boasting a 42 ton capacity with VRT capable scales. - 100 foot swath width

### 4 - Tube-Line Mfg. - Model: Nitro 600

Strobel Marketing

Nitro Spreaders heavy floor chain and the capability to reverse any time if something other than manure comes in contact with the beaters. Lifetime Warranty on sides and floor. Inter meshing beaters that are removable for stockpiling or windrowing. - 40 foot swath width.

### 5 - Kuhn Knight - Model: 2054 ProPush

Kuhn Knight of Lexington

Kuhn Knight 2054 ProPush Box Spreader with VertiSpread beaters. The hydraulic push-type design allows for no open chains, fewer moving parts, faster unloading and dependable service life. - 30 foot swath width

### 6 - Bunning - Model: 140 Truck Mount

Onken Feedlot

140 Truck mount is a 16 ton unit with hardox beaters built to withstand the most vigorous terrain and products at high flow. - 50 foot swath width

### 7 - Rief Design - Model: 22TSU

Rief Design & Mfg.

It has stainless sheet metal so manure will not freeze to side walls with a heavy plastic floor. Beaters fold completely out of the way for stockpiling and machine also dums for stock piling. - 30 foot swath width

## 8 - Bunning Model 380HD without Spinnerdeck

Onken Feedlot

380 HD heaviest built machine with capability to handle a wide variety of products. Boasting a 42 ton capacity with VRT capable scales. - 50 foot swath width

## 9 - Kuhn Knight - Model: PSC 161

Kuhn Knight of Lexington

Kuhn Knight PSC 161 truck mount spreader with the AccuSpread Spinner discharge. It provides an uniform spread pattern and coupled with the use of the metering gate it is able to accurately spread nutrient dense materials at low rates. - 60 foot swath width

## 10 - MMI International - Model HD22T-2

MMI International

MMI High speed trailer mount spreader. Exceptional performance and reliability. Versatile design: 2 or 3 beaters, mechanical or hydraulic drive, optional plastic and stainless liners, high capacity walls and silage kits, truck or trailer mount. - 10 foot swath width.

## 11 - MMI Internatinal - Model: HD20HVK

MMI International

MMI sidewinder truck mount vertical spreader. High torque, high flow hydraulic system drives the twin vertical beaters, no gear box. Wide spread pattern, even coverage, spread a variety of materials. Metering gate provides controlled application rates. Load sensing "No Plug" floor drive kick out beaters. - 30 foot swath width.

## 12 - SPREAD-ALL - Model TR22T - Horizontal

West Point Design

West Point Design builds trailers that are tough due to heavy duty components used in construction. They are popular with feedlots, dairies and commercial applicators. Simple in Design. - 12-16 foot swath width.

Visit the various vendors for details on their  
Dry and Liquid Manure application solutions.

FREE Ice Cream Served in Stevens Arena  
3:30 to 4:00 PM
