

NAWMN

Irrigation Management Information Request Form

ETgage® weekly changes can be posted on the water.unl.edu/etgage website or reported to the local NRD on a weekly basis. The ETgage should be read on the same day and approximately at the same time of each week for accuracy. Weekly total depletion in water level should be reported. In addition to the ETgage readings, weekly rainfall information should be reported and crop stage of growth. Rainfall information will enable us to analyze spatial distribution of rainfall amounts. The following information will be need from each collaborator to make a better assessment of the data and our progress with the Network.

VARIABLES	INFORMATION
Site ID:	
Crop:	
Planting date:	
Planting depth:	
Planting population:	
Irrigation method:	
First irrigation date:	
Last irrigation date:	
Watermark readings in the top 3 ft. Just before first irrigation:	1st ft. kPa___ 2nd ft. sensor kPa___ 3rd ft. sensor kPA___
Watermark readings in the top 3 ft. just before last irrigation:	1st ft. kPa___ 2nd ft. sensor kPa___ 3rd ft. sensor kPA___
Seasonal total irrigation applied:	

Your collaboration is greatly appreciated.

Sincerely,
NAWMN Team
